

Key Performance Indicators (KPI) of the Student Outcomes

Informatics Engineering

Student Outcome 1

An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.

The Key Performance Indicators of the Student Outcome 1 are:

- 1.1 Identify the components of a complex problem and relevant mechanisms.
- 1.2 Formulate and express complex problems within the field of informatics engineering using mathematical or computational tools.
- 1.3 Solve or identify solutions for complex problems applying engineering tools.

Student Outcome 2

An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

The Key Performance Indicators of the Student Outcome 2 are:

- 2.1 Conceive, design, implement and/or operate organizational systems or processes relevant to society from informatics engineering and related disciplines, to create solutions combining the tools of science and technology.
- 2.2 Evaluate the costs and benefits of informatics solutions.
- 2.3 Apply criteria for informatics solutions considering labor, environmental or social aspects.

Student Outcome 3

An ability to communicate effectively with a range of audiences.

The Key Performance Indicators of the Student Outcome 3 are:

- 3.1 Communicate effectively through writing abilities.
- 3.2 Communicate effectively through speaking abilities.
- 3.3 Communicate effectively through graphic or drawing abilities.
- 3.4 Communicate effectively to a wide range of audiences.

Student Outcome 4

An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

The Key Performance Indicators of the Student Outcome 4 are:

4.1 Understand the economic impacts of decisions associated with informatics engineering practice.

4.2 Understand the environmental impacts of informatics engineering practice.

4.3 Understand ethical implications and social responsibility of informatics engineering practice.

Student Outcome 5

An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

The Key Performance Indicators of the Student Outcome 5 are:

5.1 Demonstrate capacity for teamwork and leadership.

5.2 Function in a team characterized by a collaborative and inclusive environment.

5.3 Formulate and execute a work plan with objectives and goals.

Student Outcome 6

An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

The Key Performance Indicators of the Student Outcome 6 are:

6.1 Conduct bibliographic or technical research in the disciplines associated with informatics engineering.

6.2 Formulate work goals.

6.3 Design and conduct experiments.

6.4 Analyze and interpret results.

Student Outcome 7

An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Key Performance Indicators of the Student Outcome 7 are:

- 7.1 Select scientific and technological information.
- 7.2 Identify emerging topics or trends relevant to informatics engineering.
- 7.3 Apply critical thinking, innovation or scientific-technological curiosity.
- 7.4 Learn engineering skills autonomously.

Student Outcome 8

An ability to manage human, material, and financial resources.

The Key Performance Indicators of the Student Outcome 8 are:

- 8.1 Manage financial resources.
- 8.2 Manage human resources.
- 8.3 Manage material resources.
